

CUC-Series

Continuous Horizontal Cartoning Machine

Maximum flexibility for your secondary packaging

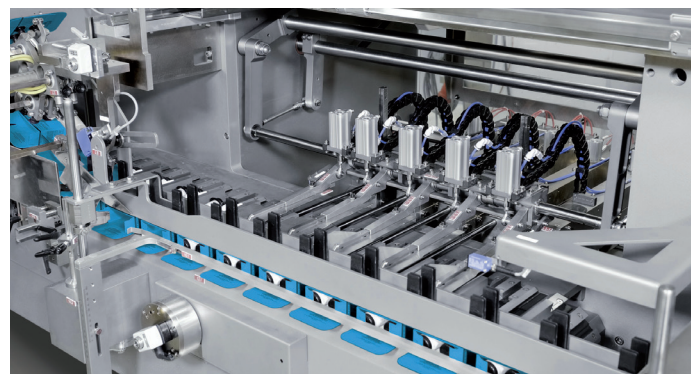

Optimal product protection for your product and convenient operating

The CUC Series is the newest continuous servo-driven packaging platform. The newly developed carton setup system combined with its servo-driven infeed pusher offers many packaging benefits for our customers. It offers the latest technology, effortless accessibility and optimal flexibility. Moreover, infeed systems, formats and closure options can be adapted to customer needs. The cartoner can easily adapt to different carton sizes and provides a secure and gentle packaging process. In addition, the CUC handles a wide variety of different products – such as bottles, vials, syringes, ampoules, tubes, blisters and trays, as well as bags, stick packs and sachets.

Machine Highlights

- Absolute flexibility for infeed systems, formats and closure options
- New carton setup solution for safe carton erection
- Fully servo-driven machine platform with servo drives for separate movements
 - Servo controlled pusher can be optimally adapted to the product properties
- Synchronized movement to link infeed pusher to product transport
- High buffer capacity for packaging materials
- Swivelling leaflet folder unit ensures easy accessibility
- Latest sensor, software and safety technology
- Patented folding carton transport units ensure gentle handling, allowing folded cartons keep their shape as they are conveyed
 - Grease free transport system, without contamination to the product or carton
 - No maintenance required
- Already prepared for product serialization

Technical Specifications

| Model | 4 inch series | 6 inch series | 8 inch series |
|---------------------------|---|--|--|
| Output rate (per minute) | 400 cartons | 260 cartons | 200 cartons |
| Carton dimensions (in mm) | A 34 - 70 B 15 - 105 H 60 - 260 | A 34 - 120 B 15 - 105 H 60 - 260 | A 34 - 150 B 15 - 105 H 60 - 260 |
